Psoriasis over the body
Eczema ... non contagious
Eczema
What is our job as an official?

- WE are not Physicians!
- We should not diagnose
- We should be vigilant
- We should recognize it is suspicious
- Our job is to RECOGNIZE ........
  ........ a SUSPICIOUS skin situation.
And THEN…

- Request a physician’s note
  - On NFHS approved medical form
  - Read it … no, really read it!
  - NO COPIES, or duplicates
  - Check dates, etc.
  - Be satisfied it is acceptable and the athlete may compete

- Is everyone safe on your watch?
